Location: Bangalore, India | Portfolio Link : <https://harshini-portfolioooooo.vercel.app/>

SUMMARY

Specializing in Information Science and Engineering, with a strong foundation in web development and data analysis. Experienced in various academic and personal projects, showcasing the ability to handle complex tasks efficiently. Skilled in using Git for version control and team collaboration. Eager to apply knowledge and grow professionally while contributing to impactful projects.

SKILLS

C++ | HTML | CSS | DBMS | SQL | Git | Java | Python | C | C# | Agentic AI

EDUCATION

RNS Institute of Technology

B.E. - Information Science & Engineering | CGPA: 8.8 / 10

2022 – 2026

Sadhana PU College, Bengaluru

12th | PUE Karnataka | Percentage: 85 / 100

2022

Jyothy Kendriya Vidyalaya, Bengaluru

10th | CBSE | Percentage: 80 / 100

2020

INTERNSHIPS

Mphasis Limited

09 Feb, 2026 - 15 May, 2026

- Worked as a **Trainee Associate Software Engineer** in the development of an **Employee Skill & Project Allocation System** using ASP.NET Core MVC, Web API, SQL Server, and Entity Framework Core.
- Implemented JWT authentication and role-based access control for secure user management.

- Built modules for employee management, skill tracking, project requirements management, project allocation, and availability tracking.
- Developed a skill-based employee recommendation and allocation system by matching project requirements with employee skills and availability.

PROJECTS

ER Triage Predictor

Project Link: https://github.com/Harshini-K18/ER_Triage_Predictor

Key Skills: Logistic Regression(ML), Python, Bootstrap

- Utilized a Logistic Regression model trained on patient data to predict ER triage levels.
- Built an interactive Flask web interface with HTML, CSS, Bootstrap, and Jinja2 templates.
- Integrated geolocation features using JavaScript.

Chatroom Application

Project Link: <https://github.com/Harshini-K18/Chatroom>

Key Skills: Bootstrap, HTML, CSS, Django, JavaScript, Git, GitHub

- Developed a Django-based chat application with functionalities for creating chat rooms, sending messages, images, videos, and emojis for interactive communication.
- Implemented user authentication and a responsive UI for seamless communication.

IntelliMeet – Meetings made Seamless with AI

Project Link: <https://github.com/Harshini-K18/IntelliMeet>

Key Skills: LLM, API, React.js, JIRA, Node.js

- Built IntelliMeet, an AI meeting bot using Recall.ai API for real-time transcription and speaker identification across Google Meet, Microsoft Teams, and Zoom.
- Developed a Node.js–Express backend with Ollama LLMs and a React frontend, enabling MoM generation, task extraction with Jira integration, Chart.js analytics, and Puppeteer-based PDF of dashboard sent to participants via email .

ASSESSMENTS / CERTIFICATIONS

- Database Management System
- Java Programming Fundamentals
- Artificial Intelligence Foundation
